

RECEIVED

Dear Wendy R. Dixon,

DEC 20 1999

I first off would like you to hear my concerns about the Yucca Mountain Project. My Es/Rp 150 TA Kelly Fitzgerald talked to use in class about the Yucca Mountain Project. What interested me was the fact that it will be affecting me in a big way. Any thing that has to do with nuclear waste and my health is something that
1 concerns me. [I was wondering if 71% of the people in Nevada oppose this project then why are you still continuing with it? Why is this site so important to you that you can't find another site to store nuclear waste? This site has been proven that it is not a site capable of holding nuclear waste. There is water that flows through Yucca Mountain and that water flows into our drinking water. Do you want to drink water that is contaminated with nuclear waste? I sure don't. I am writing to voice my concerns that I have. I am not here to solve the problem on nuclear waste, but I'm here to voice my concerns with The Yucca Mountain Project. While trying to transport the nuclear waste you could run into some problems like, what if there is an accident or the nuclear waste gets spilled? Any of those problems could affect me and I don't think I should be put in those situations.]

Sincerely,
Theresa D. Laurente
